PROFILE

I strive to create effective yet attractive design solutions for problems that will improve lives. With a passion for design across all mediums and an academic background in behavioural neuroscience, I found the perfect integration of my skills in UX design.

EXPERIENCE

UBC Launch Pad - UX/UI Designer

Vancouver, BC

September 2019 - Current

- UBC Launch Pad is a student-run software engineering team devoted to building software projects in a collaborative, professional environment
- Collaboratively conducting user research, creating wireframes, prototyping, user testing, and branding
- Effectively communicating with a team of developers, business strategists, and designers, while iterating upon feedback

Blue Pocket @ BizHacks - UI Designer

Vancouver, BC

January 2020

- Within 24 hours, designed an Android mobile app extension with a team of developers to integrate Best Buy's in-store 'Blue Shirt' service quality with their online shopping platform
- Users can receive a personalized online shopping experience with product recommendations and descriptions tailored to who they are, their needs, and their level of knowledge

Sprouts @ nwHacks - UX/UI Designer

Vancouver, BC

January 2020

- Within 24 hours, designed and conducted user research for an iOS app that helps users take care of their plants and reduce stress levels
- Created lo-fi/mid-fi/hi-fi mockups and conducted user tests to validate designs

UBC Student Communications Services - UX Researcher

Vancouver, BC

April 2019 - September 2019

- Used mixed user tests and interviews to identify issues and create solutions for users interacting with UBC online platforms
- Produced full case studies, research presentations, and analyzed user data
- Reported to designers for future improvements and changes
